Profile

Software Engineer with 2 years of professional experience at TIAA, a US-based Fortune 500 company, building scalable distributed microservices using Java and Spring Boot. Recently completed a Master of Science in Computer Science at San Diego State University. Experienced in AI integration, CI/CD pipelines and software development best practices including testing and code reviews.

Technical Skills

Languages:	Java, Python, JavaScript, SQL
Backend:	Spring Boot 3.x, Spring Security, Spring MVC, REST APIs, Microservices, Distributed Systems, JWT, Maven, Gradle
Testing/Quality:	JUnit 5, Mockito, TDD, BDD, unit/integration testing, code review
Databases:	MongoDB, MySQL, PostgreSQL, indexing, query optimization
Cloud/DevOps:	AWS (EC2, S3), Docker, Jenkins, OpenShift, Git, GitHub, CI/CD
Tools:	Postman, Swagger/OpenAPI, Splunk, Jira, Claude AI
Methodologies:	Agile, Scrum

Professional Experience

Software Engineer

TIAA Global Capabilities

Pune, India

July 2023 – July 2024

Java, Spring Boot, Microservices, MongoDB, REST APIs, Jenkins, AWS, Docker, OpenShift, Agile/Scrum

- Architected microservices handling 1M+ monthly transactions, improving scalability and reducing downtime by 20%.
- Delivered data migration pipelines transferring financial, payroll and retirement data from legacy systems into TIAA's cloud platforms, ensuring data accuracy across Tableau and MongoDB.
- Engineered 10+ RESTful APIs across distributed services, improving request processing by 15% and reducing latency through performance tuning.
- Participated in code reviews and design discussions, driving engineering best practices and mentoring an intern across onboarding, system walkthroughs and knowledge sharing.

Software Engineer Trainee

TIAA Global Capabilities

Pune, India

July 2022 – July 2023

Java, Spring Boot, MongoDB, REST APIs, JUnit 5, Mockito, Splunk, Jenkins, Cucumber

- Diagnosed and resolved critical production defects using Splunk logs and deep debugging, reducing defect leakage and directly contributing to stakeholder discussions on system reliability.
- Maintained 90%+ automated test coverage using JUnit 5 and Mockito, reducing regressions and improving release confidence.
- Optimized Cucumber BDD test suites integrated into Jenkins CI pipelines, reducing test execution time and improving build feedback cycles.

Projects

PRISM - Pull Request Intelligence System 🤖

Java 21, Spring Boot, Claude AI, GitHub Webhooks, React, MongoDB, Docker

- Built an AI-powered code review automation tool that captures GitHub PR webhooks, extracts diffs and posts structured Claude AI reviews directly as GitHub comments within seconds of a PR being opened.
- Engineered a Spring Boot backend with a webhook handler, Claude AI integration and MongoDB persistence to store review history including quality scores, complexity analysis and security flags.
- Designed a React dashboard to filter, search and track AI review history across repositories with real-time data from REST APIs.
- Containerized the full stack using Docker and Docker Compose; wrote 17 unit tests using JUnit 5 and Mockito covering webhook processing and AI response handling.

PayrollCore - Enterprise Payroll Management System 🤖

Java 21, Spring Boot, MongoDB, JWT, JUnit 5, Swagger

- Engineered 3 independent microservices (Auth, Employee, Payroll) using Java Spring Boot 3.5 with separate MongoDB databases per service and inter-service REST communication.
- Implemented JWT based authentication with role based access control across all services supporting admin, HR, finance and employee roles.
- Designed a payroll calculation engine with configurable tax slab based income tax, provident fund and health insurance deductions to generate monthly payslips.
- Wrote 21 unit tests using JUnit 5 and Mockito across all 3 services covering success, failure and edge case scenarios.

Education

M.S. in Computer Science

San Diego State University, San Diego, CA

GPA: 3.66/4.0

August 2024 – May 2026 · Graduated

B.E. in Computer Science

Savitribai Phule Pune University, Pune, India

GPA: 3.9/4.0

August 2018 – May 2022
